Function works properly

Remote and Local Files [Reference](#)

Remote file

<https://moaazgab.github.io/AdvancedProgramming/HomeWork/HW2/icon192x192.png>

Choose Files No file chosen

Sample code

```
function fileSelect() {
    fetch(remote.value).then(r => r.blob())
        .then(checkFiles) //called with Blob b
}
function checkFiles(b) {
    out.innerHTML = '';
    let a = [...local.files]
    let found = 0;
    let nameList = []
    for (let f of a) {
        out.innerText += f.name + ", ";
        if (f.size == b.size && f.type == b.type) {
            found += 1;
            nameList.push(f.name);
        }
    }
    out.innerHTML += '<br/>Result: ' + a.length + ' items checked, ';
    if (found > 0) {
        a = nameList;
        for (let f of a) {
            let element = f;
            out.innerHTML += `${element}.bold() + ", ";
        }
        out.innerHTML += " are the same.";
    }
    else {
        out.innerHTML += "all files are different.";
    }
}
```
